**REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach or render obvious to overall claimed method for delivering a physiologically active compound to a patient comprising the steps of placing a substrate in an airway, wherein the airway has a cross-sectional area such that for volumetric gas flow through the airway of 10-120 liter per minute, gas speed over the compound is sufficient to decrease the decomposition of the compound upon heating; and allowing the cooled vapor to condense to form an aerosol, wherein the aerosol has a lower fraction of decomposition than when the compound is vaporized in the absence of gas flow. And also simultaneously passing a gas across the surface of a compound, the compound being contained in a heating-vaporization-mixing zone having a sufficiently restricted cross-sectional area to increase the rate of gas passing across the compound and to achieve a lower level of decomposition than occurs upon vaporization of a similar quantity of a quantity of the compound at a similar temperature in the absence of gas passing across the compound.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
